

How to Quilt a Design

1. Select Design

- Select **File** tab.

- Press **Design**.

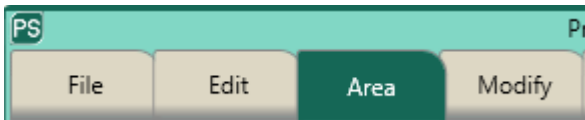

- Press **Open**.
- Select **Designs/HQ Designs/Blocks/Feather Block**

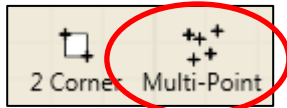

2. Create an Area

- Select **Area** tab.

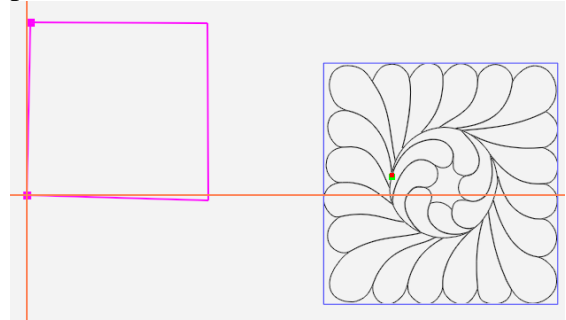

- Move machine to top left corner of the quilt block.
- Press **Multi-Point**.

- Move machine to the top right corner of block.
- Press **Multi-Point** again.
- Move machine to the bottom right corner.
- Press **Multi-Point**.
- Move machine to bottom left corner.

- Press **Multi-Point**. The area now appears as a pink box.

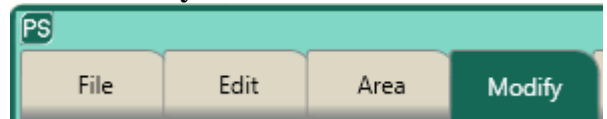

- Press **Refresh** in the status bar at the bottom of the screen. The area, design and crosshairs will be visible in the workspace window.

3. Skew to the Area.

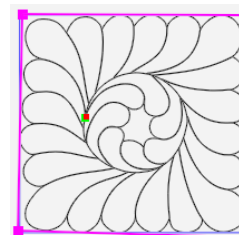

- Select **Modify** tab.

- Press **Skew**.
- Press **Skew 1** in the sidebar on the right side of the screen.

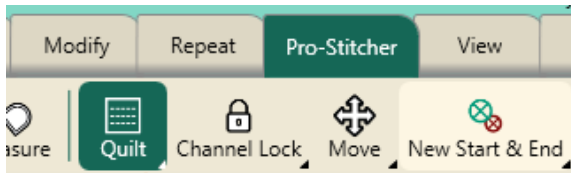

- The design will resize and reposition within the area box.

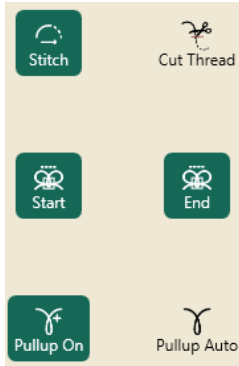

4. Quilt Design on Fabric

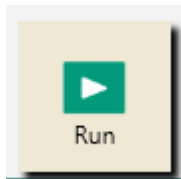

- Select **Pro-Stitcher** tab.
- Press **Quilt**.

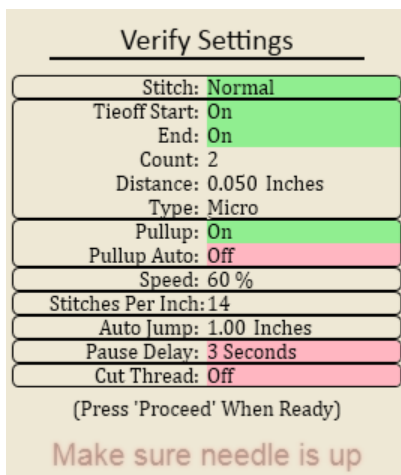

- Select functions in the sidebar such as **Stitch**, **Start**, **End**, and **Pullup On**.

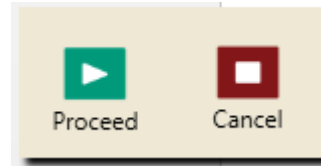

- Press **Run**.

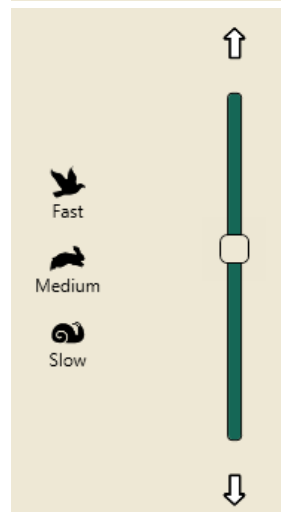

- The Verify Settings box will pop up on the screen.

- If all the settings are set correctly, press **Proceed**.

- If the settings need to be adjusted select the setting, such as **Speed**, in the sidebar.

- Adjust the speed to a slower or higher speed by sliding the handle up or down on the slider.
- If all other settings are correct press **Proceed** to take a pullup stitch, tie off, and start stitching.
