

How to Save an Area

Create an Area such as a triangle, circle, square, rectangle or any other shape and save for use in another application.

1. Create an Area

- Select **Area** tab.

- Move machine to a corner of the triangle on the quilt.
- Press **Multi-Point**.

- Continue moving the machine and pressing **Multi-Point** at the other two corners of the triangle quilt block.
There should be three points for the area.

- The area now appears as a pink shape.
- Press **Zoom to Area** in the status bar. The area and crosshairs will be visible in the workspace.

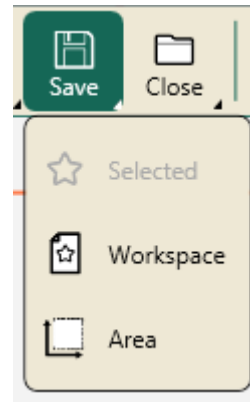

2. Save Area

- Select **File** tab.

- Press **Save**.

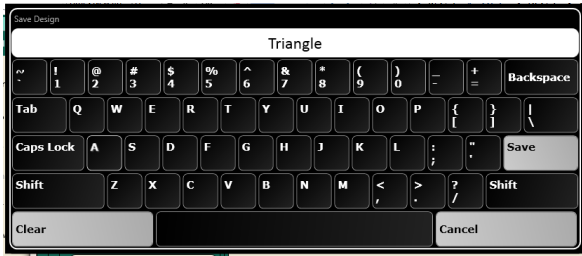

- Press **Area**.
- Choose a location to create an **Area Folder**. In this example the Area Folder was saved in **C:\ Designs/HQ Designs/Areas**

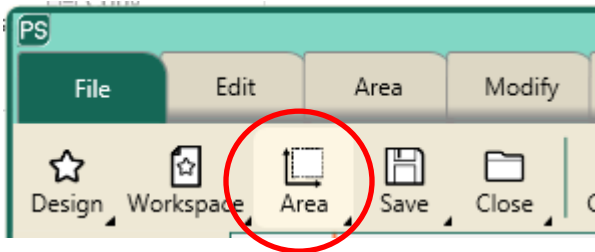

- After creating the Area Folder, select the folder and touch the title bar.

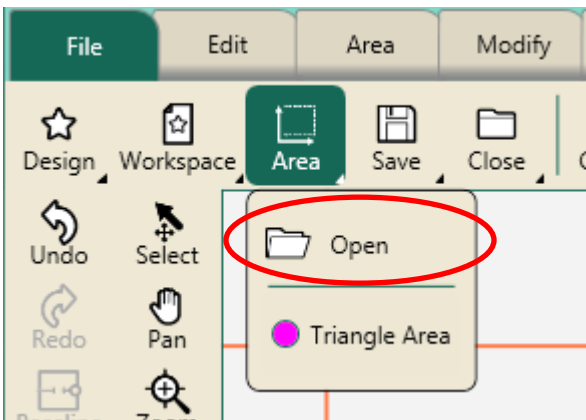

- A keyboard will pop up on the screen. Type in the name of the area and press **Save**.

- To open an existing area Select **File**.

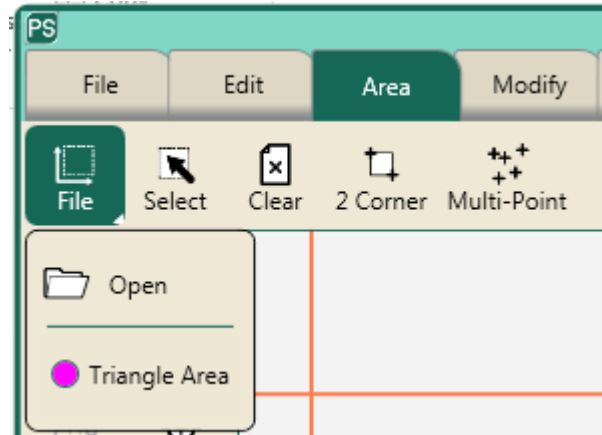

- Press **Area** in the File ribbon.
- Press **Open** or it may be in the drop down menu if it was used recently.

Or

Select **Area Tab/File/ Open**. Navigate to the desired folder, and select the area file (with a file extension of .hqa). Then select the **Open** button. If the area file was used recently, it will show up in the drop-down menu so you can quickly select it.

- Your library of areas may look like this if you have saved a few different areas for future use.

- The area shape will always open on the screen with pink dashed lines. This indicates it will need to be repositioned and possibly resized for your particular quilt.
